Back-End Tech Stack

PHP (Core & OOP), WordPress (Themes & Plugins), WooCommerce, Shopify, CS-Cart, Laravel / CodeIgniter, MySQL, REST APIs, CRM Integrations, Database Optimization, AWS, Server Management

Tools & Workflow

Git, GitHub, VS Code, Postman, Jira, CI/CD, Cloudflare, Docker (optional), Performance Monitoring Tools

ABDUL MANAF M

With a strong track record in full-stack web development, eCommerce solutions, and performance optimization, I specialize in creating scalable, high-performing websites that enhance user experience and business outcomes.

At techcarrot, I lead end-to-end project delivery across WordPress, WooCommerce, Shopify, CS-Cart, and custom PHP frameworks, combining modern JavaScript technologies, API integrations, cloud infrastructure, and automation workflows.

My expertise spans API engineering, performance tuning, SEO optimization, scalable CMS architecture, and technical leadership. I have been recognized with the High Flyer Award and multiple performance awards for excellence in technical delivery, leadership, and innovation.

Core Strengths

- WordPress & WooCommerce development (themes, plugins, custom solutions)
- Custom WordPress theme and plugin development from scratch
- Advanced theme/plugin customization, optimization, and security hardening
- Website performance enhancement & Core Web Vitals improvements
- On-site SEO and technical SEO optimization
- Expertise in industry-leading themes (AVADA, DIVI, Jupiter, The7, Bridge, Salient)
- Mastery of key plugins: Contact Form 7, WooCommerce, Booking Calendar, ACF Pro, Elementor, Visual Composer, and custom plugins
- End-to-end website management: updates, speed optimization, troubleshooting
- PSD/XD/Figma to HTML/WordPress (responsive, mobile-friendly)
- Shopify, CS-Cart, and headless CMS solutions (e.g., Strapi)
- Server administration: dedicated servers, AWS setup, domain/DNS, backups, security, and cloud optimization
- API integration and development (REST API, CRM integrations, payment gateways)
- Automation workflows using AI tools, prompt engineering, and content/UI generation assistance
- CI/CD pipelines and modern DevOps workflows (Git, Cloudflare, performance monitoring)
